I'm a self-taught web developer with a passion for code and building full-stack applications with beautiful modern designs for myself and for the clients that I've worked with. I specialize in the MERN tech stack giving me the power to build web experiences for whoever visits them.

SKILLS

React.js, Redux, React hooks, Node.js, Express, HTML5, CSS, SCSS, Axios, MongoDB, Sqlite3, JWT auth, Middleware, GoogleOauth, Heroku, Cpanel, Bootstrap, API integration, NPM, Yarn, Adobe Photoshop, Adobe XD, Figma

PROFESSIONAL EXPERIENCE

AHES   Albuquerque, NM
https://www.americanhouseholdestatesales.com/
Fullstack developer (contract)   *August 2021 – September*
- **Designed a modern-looking website using photoshop and Figma for the wireframe and executed the design with React and SCSS.**
- **Built an API using node.js and sqlite3 as the database and connected the API to the frontend with Axios using react hooks to fetch, post and delete the data.**
- **Eliminated the client's issue with the previous site only giving him the option to upload 1 picture at a time which proved to be unreliable, which then I utilized base64s drag and drop system allowing the client to upload 100s of photos at a time to the API.**
- **TECH USED: (React.js, React hooks, Node.js, Express, Sqlite3, SCSS, Heroku)**

HUMBLE NUTRITION   Albuquerque, NM
https://www.americanhouseholdestatesales.com/
Front end developer (contract)   *February 2021 – March 2021*
- **Built the front end with basic HTML, CSS, SCSS, and Javascript to make the user experience unique by including interactivity using vanilla JS**
- **Increased overall customer interaction and visitation with the company tracked with google statistics.**
- **Gave customers a place to view their full menu other than just the companies Instagram/Facebook**
- **TECH USED: (HTML5, SCSS, Javascript ES6, PHP, google maps API)**

PROJECTS

BLOOKIFY
https://www.americanhouseholdestatesales.com/
Fullstack MERN application
- **Implemented Redux for the first time utilizing its capability to store the whole global state of the app inside an object tree inside a single *store* giving the users a consistent UI, based on the predicted state that the app is in, creating a unique UI experience based on the user!**
- **Built an API with node.js for users to send their favorite books from google books API (users also have the option to create their own books)to 2 different routes to store the books they've read or are reading.**
- **Used JWT authentication system to allow users to have their info**
- **TECH USED: (React.js, Redux, React hooks, Node.js, Express, Axios, MongoDB, SCSS, Google books API, JWT auth, GoogleOauth)**

BLOOKIFY
https://www.americanhouseholdestatesales.com/
React application
- **Built an interactive and unique design using React.js and SCSS, giving all who visit a place to view all of the projects I have built for myself and for my clients while giving access to the source code and ways to contact me/find me throughout the web.**
- **TECH USED: (React.js, React hooks, SCSS)**
